

Site Tablet 10

TOUGH, PORTABLE AND CONNECTED FIELD COMPUTER

Now you can truly connect your office to the construction site. By incorporating a cellular modem, laptop, GPS and controller, Trimble® has improved in-field computing and eliminated the gap between office design and field implementation. The easy-to-use Trimble Site Tablet 10 allows construction professionals to make design changes in the field, connect to the office for on-the-spot approvals and communicate changes to field crews. From the field, to the truck cab, to the office, users stay connected and work faster. With instant email access and data synchronization from the construction site, there are no more delays associated with driving data updates to and from the office and field.

Key Features

Rugged Field Computer

The Trimble Site Tablet 10 is a new and improved tablet controller ruggedized to stand up to any construction site, in any weather. The vibrant display is powerfully illuminated, so you can finish any job fast, even in bright sunlight conditions. The long life lithium ion batteries ensure hours of field computing and Connected Site® operation.

Solutions for Everyone on the Job Site

The Trimble Site Tablet 10 is compatible with both Trimble SCS900 Site Controller Software and Trimble SitePulse™ field software. When paired with SCS900, the Site Tablet 10 is ideal for construction surveying, stockpile measurements and grade verification. Alternatively, field managers can use the Site Tablet 10 with SitePulse software for planning, site navigation, and reporting tasks.

USING THE TRIMBLE SITE TABLET 10 AS PART OF THE SITEPULSE SYSTEM, FIELD MANAGERS CAN:

- ▶ Make decisions faster, reinforced by accurate documentation
- ▶ Reduce the dependency on the surveyor by performing simple positioning tasks
- ▶ Access up-to-date data to support decision-making
- ▶ Increase production, reduce rework, and document work quality
- ▶ Improve communications between the field and office by connecting more people on the jobsite

USE THE TRIMBLE SITE TABLET 10 AND SCS900 FOR:

- ▶ Measuring and verifying original ground levels and site features
- ▶ Monitoring real-time cut/fill information
- ▶ Checking finished grade and laid material thickness against design elevations and tolerances
- ▶ Computing progress and material stockpile volumes
- ▶ Monitoring and conducting quality control for earthworks and paving operations
- ▶ Assessing as-built measurements and generating high quality reports for record keeping, approvals and payment purposes
- ▶ Synchronizing design and field data via the Internet
