

# NEW! AutoSync

The new AutoSync™ feature automatically syncs guidance lines, field names, boundaries, landmarks, and operator information across all of your connected devices – Trimble TMX-2050™ and GFX-750™ displays, as well as Trimble Ag Software on your computer or mobile device.

Once enabled, AutoSync works in the background to keep all of your data synced, eliminating USB hassles while reducing the potential for human error.

## KEY BENEFITS:

- ▶ **Save Time** - Share guidance lines across all supported devices used in the farm operation, eliminating dual entry of data.
- ▶ **Improve Efficiency** - Ensure definition and use of guidance lines is consistent for all operators through automatic syncing.
- ▶ **Reduce Human Error** - Improve integrity of records by eliminating errors caused by multiple entry of guidance lines, field names, field boundaries, and landmarks.
- ▶ **Leverage Two-Way Data Transfer** - Powered by AutoSync, Trimble Ag Software solutions enable automatic two-way data transfer with supported displays.
- ▶ **Satisfy Regulatory and Contractual Obligations** - AutoSync enables easy creation of application coverage maps (proof of placement reports).
