

Connect Your Entire  
Farm Operation  
with Trimble Ag Software

# Farm Data Management

TRANSFORMING THE WAY THE WORLD WORKS

Connect your entire farm operation with an innovative, fully integrated software solution that will transform the way you farm.

## PRECISION MAPPING SIMPLIFIED

Transfer data from Trimble® displays and many other third-party systems. We have API agreements with top equipment manufacturers for seamless wireless data flow as well as USB compatibility, supporting almost every precision ag system.

Our powerful yet easy-to-use software platform ties your entire farming operation together, and is available from any device, 24/7.

Trimble Ag Software is an integral part of Trimble's Connected Farm® solution, a unified suite of precision ag applications covering all aspects of modern agricultural management.

## Key Benefits

**Save Time** — Share farm data across all devices in real time, eliminating dual entry and USB hassles.

**Improve Efficiency** — Automate critical workflows to make smart in-season decisions that improve the bottom line.

**Reduce Human Error** — Improve field record integrity and streamline data entry with software that syncs automatically.

**Drive Profits** — Track your cost per acre so you can make intelligent decisions throughout the growing season.

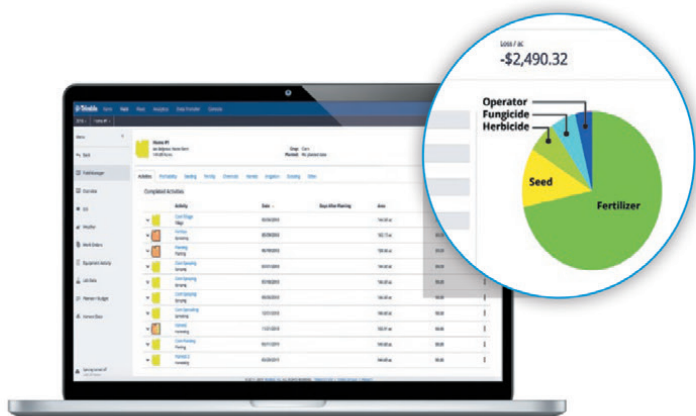

## SUPERIOR MOBILE APP

No other software platform packs more power into its app. Access your data around the clock to make smart, profitable decisions in real time.

## FINANCIALS AT YOUR FINGERTIPS

Easily track your production costs for each field so that you have real-time knowledge about expenses and break-even calculations throughout the growing season. Tie in your mapping to generate Profit Maps so you can deep-dive into each field to see which precision farming practices are most profitable.

**Connect Your Farm** The new AutoSync™ feature automatically syncs guidance lines, field names, boundaries, landmarks, and operator information across all of your connected devices — Trimble TMX-2050™ and GFX-750™ displays, Trimble Ag Software on your computer or any mobile device. Once enabled, AutoSync works in the background to keep all of your data synced, eliminating USB hassles while reducing the potential for human error. The AutoSync feature is included with Farmer Core, Farmer Fit, and Farmer Pro software solutions.

# Product Features

Trimble's three software bundle options — **Farmer Core, Farmer Fit, and Farmer Pro** — offer levels of functionality that are tailored to your farm's operation.

		Farmer Core	Farmer Fit	Farmer Pro
	User logins <sup>1</sup>	Up to 5	Up to 5	Up to 5
Farm Setup	Manage client/farm/field names with boundaries	X	X	X
	Sync desktop data to cloud	X	X	X
	Map landmarks with mobile app (points, lines, and boundaries)	X	X	X
	Includes technical support and onboarding training for getting started <sup>2</sup>	X	X	X
Farm Operations	Manage guidance lines	X	X	X
	Includes AutoSync for syncing guidance lines and other data to all Trimble connected devices <sup>3</sup>	X	X	X
	Import/export or use third-party APIs to get data to/from precision farming displays	X	X	X
	Process yield data with yield cleaning tool	X	X	X
	Track equipment locations, status, and utilization			X
	Create and assign Work Orders and monitor the status of each			X
Farm Records	Create detailed crop plans	X	X	X
	Add materials and track purchases and usage by field with costs	X	X	X
	Print a 'Proof of Placement' report that includes a coverage map and details for each task	X	X	X
	Includes desktop farm management software with basic accounting (ongoing updates included)		X	X
	View basic weather with option for upgrading to Ag Premium Weather		X	X
	Enter detailed field records for seed, chemical, fertilizer, harvest, and other applications		X	X
VRA Tools	Use drawing tools to layout management zones based on yield and other geospatial data		X	X
	Create simple VRA prescription maps			X
	Utilize the mobile app for grid or zone soil sampling, including navigation to sample sites			X
Grain Marketing	Track bin inventory			X
	Manage grain contracts and market position statements			X
In-Season Monitoring	View Crop Health Imagery for each field <sup>4</sup>			X
	Record crop scouting events and create product application recommendations			X

<sup>1</sup> Additional user logins can be purchased separately.

<sup>2</sup> Complimentary remote training is available in English, expanding to other languages in the future.

<sup>3</sup> AutoSync automatically connects all your smartphones, computers and Trimble displays (using the Precision-IQ™ software). Each connected Trimble display requires a Display Connection with modem & data plan or a third-party Wi-Fi adapter.

<sup>4</sup> Includes up to 10,000 acres of Crop Health Imagery. Additional acres can be purchased by reaching out to sales at 1-800-282-4103.
