

# 360 Total Station Prism

Introducing the latest version of the Trimble® 360 Total Station Prism. The prism constant and height adapter values remain the same from the legacy version. This means that the new prism can still be used with older versions of Trimble SCS900 Site Controller Software and Trimble Siteworks Positioning System Software when selecting the “360 Degree” target type. This target is also compatible with the Target ID and mini rod (PN 58314019-HH).

Features of the new target include:

- Flat sides for easier offset measurements and to avoid rolling when leaned on a wall
- Leveling bubble in top 5/8th thread
- Replaceable top cap and height adapter
- Prism constant remains the same at 2mm
- New color scheme and Trimble branding

This new version of the Trimble 360 Prism replaces the current version (PN 58128001-HH).
